Art Unit: 1638

1. The claims have been amended as requested in Paper No. 7, filed 21 April 2003 have been entered. Claims 14-20, which the amendment indicates as being withdrawn, were cancelled in the amendment filed 26 September 2002. Claims 2-3, 6-13 and 21-28 are pending.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. The abstract is not descriptive of the instant invention, which is the NI16 gene from Arabidopsis, not the potato and tomato homologues. A new abstract is required that is clearly indicative of the invention to which the claims are directed. The abstract of the disclosure should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.
4. The title of the invention is not descriptive of the instant invention, as above. A new title is required that is clearly indicative of the invention to which the claims are directed. Note that titles can be up to 500 characters long.

Response to Arguments

5. The rejection of claims 1, 4-5, 6-12 and 21-28 under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement is withdrawn on light of Applicant's arguments.

Response to Amendment

6. The objection to claims 3, 9 and 24 is WITHDRAWN in light of amendment to the claims.

Claim Rejections - 35 USC § 112

7. Claims 3, 12 and 21-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter that Applicant regards as the invention. Dependent claims are included in all rejections. The rejection is modified from the rejection set forth in the Office action mailed 5 December 2002, as applied to claims 12-13 and 27-28, and for the new reasons below. Applicant's arguments filed 21 April 2003 have been fully considered but they are not persuasive.

It is not clear in claims 12 and 27 if the transgenic seed comprises the chimeric gene of the instant invention or if they are transformed with some other nucleic acid.

Applicant urges that because the seed is transgenic it would comprise the nucleic acid molecule of claim 2 (response pg 9-10).

This is not found persuasive because the seed may be transgenic because it has been transformed with some other nucleic acid. It is suggested that the claim be amended to insert --, wherein the seed comprises the chimeric gene-- before the period.

Claim 3 is indefinite in its recitation of "the coding region of SEQ ID NO:1" in line . because any DNA has 6 potential readings frames each comprising at least one open reading frame, it is unclear which coding region of SEQ ID NO:1 is being referred to.

8. Claims 2-3, 6-12 and 21-28 are free of the prior art, given the failure of the prior art to teach or suggest an isolated nucleic acid encoding SEQ ID NO:2.

Art Unit: 1638

Conclusion

9. No claim is allowed.

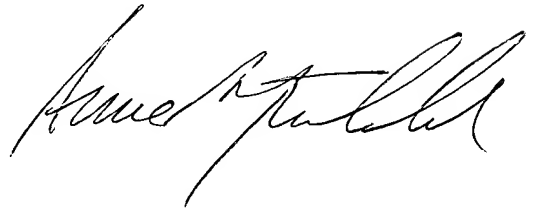

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne R. Kubelik, whose telephone number is (703) 308-5059. The examiner can normally be reached Monday through Friday, 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson, can be reached at (703) 306-3218.
